

# *Our Yard*

## *Where do YOU Spend YOUR Money?*

Several men in the plant have asked me what I think about American ship operators having new additions to their fleets built in foreign shipyards. Many others have been discussing these contracts which naturally mean less work in American yards, and at a time when our new ship construction has a rather bleak outlook.

Of course, none of us in this industry like it, but if we just members in the position of the management of a fleet—perhaps we see the action in a new light. What would you tell your stockholders if they asked why you had ordered a new hull from domestic production when you might have ordered a 40% saving in costs by placing the order in a foreign yard?

Would the patriotic—hey, American—segment hold if your employees weren't already slipping to the annual measurement of doing business.

When you manage, one of your first objectives is to keep production in order to keep your price to your customer (your real employer) competitive. If you fail in this you may lose not only your customer, but your investment too—and be replaced by a more economical and efficient manager.

There is no discussion on alleged relations which I think shammy and which warrants more study. It is said, "Why doesn't the government step in?" or, "There ought to be a law forbidding fleet operators from placing contracts abroad?" Are there no answers for increasing activity in American yards?

Such request for government intervention can (and often does) work in reverse. If Washington has the power to tell a corporate executive where he cannot buy ships, it acquires a similar power over all business operations, and ultimately over all individuals. Do we want, for example, government to tell us where to work and set the wage rate as well? What is to stop the same authority from forbidding the purchase of shoes in Delaware, or even our going to the movies in Philadelphia under the promise that there is no currency money in Chester it should be spent here?

To my mind, there has already been too great a transfer of private responsibility to government. If we continue to seek subsidy and social security, we not only hamstring the free enterprise flow of material—new products of time and labor-saving, convenience and enjoyment—but we become slaves to high taxes and bureaucratic direction. Until recently at least, America has gotten great by preferring freedom to work where you want to and spend your money as you wish. We have bought big new property which are the envy of millions—and silly enough they are not worth. Yet most foreign countries and even some American citizens today regret them.

I wish that our plant had more work, but I do not believe that we want this at the expense of our right to lead our own lives in the fashion we select.

Dean Student Body 4 in 1  
in Graduating from M.I.T.

## WINNER OF SUN'S DRAFTING AWARD WILLIAM DOUGHERTY VISITS YARD

**WILLIAM DOUGHERTY, JR.**, one of the first students of 21 Sun, graduated with honors from Massachusetts Institute of Technology in June. Having received a degree in business and engineering administration, he plans to take a position with the Warner & Swasey Co. in Cleveland Ohio and will be employed, with study at the Case Institute of Technology to work toward his master's degree in engineering administration.

An honor student when he graduated from Middlebury Knowledge High in 1928, he was prominently on the lists for an M.I.T.

**AGENTS OF SUN'S** right, visited the approved and visited with Vice President John S. Pava, Jr., June 17th, having had with them several prominent members of the College who had been studying in an engineering program.

### OUR YARD CORRESPONDENT

Patricia Hagan and Richard "Red" Johnson, reported on July 29, 1928 in their report, that on receipt of the plans, they in turn, have the to read them and submit reports.

The work here and given the fact in their intelligence.

1928  
1928  
1928

An interesting meeting that evening followed.

In the presence of the 1928 crowd by John Hagan and Richard Johnson, the first and last of the 1928 class of Sun High, the meeting.

The group of the crowd in your own words, giving an entire account of a student's career to date.

I would like to say that we will be very pleased to see you.

Wm. Dougherty, Jr.  
1928

and the 1928 class which looked through for going around the yard and the flag of the 1928 class, that will show an account about it. It is a very interesting one for the 1928 class and the 1928 class.

**LEAVE THE HOUSE - from Page 10**

After a long and hard day, the exhausted man returned home. He found his wife sitting on the bed, looking at him with a sad expression. She said, "I'm glad you're home, but I'm afraid I've had to tell you something that will make you leave the house."

"What is it?" he asked, sitting on the edge of the bed. "I'm afraid I've had to tell you that I've found out that you've been cheating on me with another man."

"What?" he said, looking at her in disbelief. "I've never been with anyone else. I've been faithful to you every day of my life."

"I know that," she said, looking down. "But I've found out that you've been cheating on me with another man. I've found out that you've been with another woman for a long time."

"I've never been with anyone else," he said, looking at her in disbelief. "I've been faithful to you every day of my life. I've never been with anyone else."

## THE MOLD LOFT AT WORK

By Jack Nelson, Foreman

When a mold is used to make a concrete part, the mold is filled with concrete. The mold is then vibrated to settle the concrete. The mold is then removed and the concrete part is left to cure. The mold is then used again to make another part. This is the mold loft at work.

The mold loft is a place where the mold is made. The mold is made of wood or metal. The mold is then used to make a concrete part. The mold is then removed and the concrete part is left to cure. The mold is then used again to make another part. This is the mold loft at work.

## Sun Ship Mutual Benefit Association

The following is a statement of the Receipts and Disbursements of the Sun Ship Mutual Benefit Association for the month of April, May and June 1958.

Balance carried over from 3/31/58 ..... \$ 2,000.00

### Receipts

#### From Associated Ship Members

April .....	1,200.00	
May .....	1,200.00	
June .....	1,200.00	3,600.00

#### From Associated Ship Companies

April .....	1,200.00	
May .....	1,200.00	
June .....	1,200.00	3,600.00

#### From Charitable Ship Contributions

Marine Mutual Co. ....	100.00	
American Mutual Co. ....	100.00	
M. J. Hawkins Mutual .....	100.00	
A. I. & S. ....	100.00	
Wichita Falls Co. ....	100.00	
Wagoner Supply Co. ....	100.00	
Continental Mutual Co. of N. Y. ....	100.00	
American Building Co. ....	100.00	
W. A. Reed Co. ....	100.00	
International Marine Co. ....	100.00	
Wichita Falls Mutual Bank .....	100.00	
Total .....	1,000.00	11,000.00

\$ 15,000.00

### Disbursements

#### For Benefits

April .....	1,000.00	
May .....	1,000.00	
June .....	1,000.00	3,000.00

#### Administrative Costs

April .....	100.00	
May .....	100.00	
June .....	100.00	300.00

#### Reserve Fund Expense

April .....	100.00	
May .....	100.00	
June .....	100.00	300.00

Balance carried over from 3/31/58 ..... \$ 2,000.00

Receipts for April, May and June 1958 ..... 17,000.00

Disbursements for April, May and June 1958 ..... 3,700.00

and a few thousand per day? The National Highway and Motorway Authority, which is the body that will be responsible for the construction of the roads, is not sure that it will be able to raise the necessary funds. It is also not sure that it will be able to raise the necessary funds. It is also not sure that it will be able to raise the necessary funds.

The fact is that the roads are not being built. The fact is that the roads are not being built. The fact is that the roads are not being built. The fact is that the roads are not being built. The fact is that the roads are not being built.

## INK SPOTS

FROM THE  
CLASS MEMBERS' ROOM

By C. J. Grand

As you know, the school is having a yearbook sale. This is a chance for you to get a yearbook for yourself or for a friend. The yearbook is a record of the school's activities and is a valuable keepsake. It is also a great way to support the school. The yearbook is available for purchase at the school store. The price is very reasonable and the yearbook is a great gift. So, if you are looking for a gift or want to support the school, buy a yearbook today!

**By John A. Hoffbauer**

There are thousands of electricians in the United States who are interested in the work of the International Brotherhood of Electrical Workers. The IBEW is a union of electricians, and it is one of the largest and most powerful unions in the country. It has a long history and a strong record of achievement. It has fought for the rights of its members and has won many important battles. It has also worked for the betterment of the community and the improvement of the lives of its members. The IBEW is a proud and honorable organization, and it is one that every electrician should be proud to belong to.

**Notes on the French System**

Workman working on a large piece of electrical equipment in an industrial setting.

It is noted that the French system of electrical work is very different from the American system. The French electricians are very skilled and they work in a very organized manner. They have a long history of working together and they have a strong sense of community. They are very proud of their work and they take a great deal of pride in their craft. They are also very hardworking and they are always looking for ways to improve their work. The French system of electrical work is a very interesting and unique one, and it is one that every electrician should be interested in.
